Technical and regulatory information

Logging practices

ERGONOMICS INTERNATIONAL, LLC automatically records the Internet Protocol (IP) addresses of visitors. The IP address is a unique number assigned to every computer on the internet. Generally, an IP address changes each time you connect to the internet (it is a "dynamic" address). Note, however, that if you have a broadband connection, depending on your individual circumstance, the IP address that we collect may contain information that could be deemed identifiable. This is because, with some broadband connections, your IP address doesn't change (it is "static") and could be associated with your personal computer. As well as recording the IP addresses of users, ERGONOMICS INTERNATIONAL, LLC may also keep track of sites that users visited immediately prior to visiting ERGONOMICS INTERNATIONAL, LLC's website and the search terms they used to find it. We keep track of the pages visited on ERGONOMICS INTERNATIONAL, LLC's website, the amount of time spent on those pages and the types of

searches done on them. Your searches remain confidential and anonymous. ERGONOMICS INTERNATIONAL, LLC uses this information only for statistical purposes to find out which pages users find most useful and to improve the website.

ERGONOMICS INTERNATIONAL, LLC also captures and stores information that you transmit. This may include:

- Browser/Device type/version

- Media Access Control (MAC) address
- Date and time of the server request
- Volume of data transferred

ERGONOMICS INTERNATIONAL, LLC provides these links solely for your information and convenience. When you transfer to an outside website, you are leaving the ERGONOMICS INTERNATIONAL, LLC domain, and ERGONOMICS INTERNATIONAL, LLC International information management policies no longer apply. ERGONOMICS INTERNATIONAL, LLC encourages you to read the privacy statement of each external website that you visit before you provide any personal data.

Cookies and web beacons

Cookies and web beacons are electronic placeholders that are placed on your device by websites to track your individual movements on that website over time. ERGONOMICS INTERNATIONAL, LLC uses both session-based cookies (which last only for the duration of the user's session) and persistent cookies (which remain on your device and provides information about the session you are in and waits for the next time you use that site again). These cookies and web beacons provide useful information to ERGONOMICS INTERNATIONAL, LLC, enabling us to recognize repeat users, facilitate the user's access to and use of our sites, allows us to track usage behavior, and to balance the usage of our websites on all ERGONOMICS INTERNATIONAL, LLC web servers.

Tracking cookies, third-party cookies, and other technologies such as web beacons may be used to process additional information, enable non-core functionalities on the ERGONOMICS INTERNATIONAL, LLC website and enable third-party functions (such as a social media "share" link). We may also include web beacons and other similar technology in promotional email messages to determine whether the messages have been opened.

Do Not Track (DNT)

The online advertising industry has self-regulatory initiatives designed to provide consumers a choice in the types of ads they may see online and to conveniently opt-out from online behavioral ads served by some or all of the companies participating in these programs. Our websites do not respond to DNT consumer browser settings.
